BACKGROUND

Intecno-DHI is planning periodical informal information and debate meetings at the headquarters of Intecno-DHI in Torino as well as other places and cities in Italy during 2003.

The objective of our information meetings is to inform and debate the DHI software tools and their application. This will give our users, potential users and modellers in general the opportunity to be informed about the DHI software and the latest developments, exchange experiences and ideas among users and practitioners of numerical modelling; discuss the application and methodology, particular problems and improvements of the hydroinformatic tools with DHI and Intecno-DHI experts.

The information meetings are free of charge/gratuito.

The first information and debate meeting will take place in Intecno-DHI, Via Pomba 23, 10123 Torino, on Tuesday 25 February 2003 09.30 - 13.00. The speaker will be Mr Borge Storm, Head of Water Resources Software Department, DHI Water & Environment, Denmark. Mr Borge Storm will inform about MIKE SHE and MIKE BASIN, show simple and advanced applications of the two modelling packages and describe the latest developments of the software. After the information and debate meeting Borge will be happy to have individual meetings (each meeting of 30 minutes duration) about specific projects and/or issues with interested participants!

Mr Borge Storm has been involved in the development of MIKE SHE and MIKE BASIN right from the beginning and he has wide experience in the application of MIKE SHE and MIKE BASIN in different types of water resources projects. Borge has been employed by DHI since 1982 and is today Head of Water Resources Software Department, DHI Water & Environment, Denmark.

Deadline for registration is Wednesday 19 February 2003 on the "Registration Form" (attached):

Meet Borge Storm,
Head of Water Resources Software
Department, DHI Water & Environment,
Denmark., for debate meeting and
individual talks!
Tuesday 25 February 2003
in Intecno-DHI.

PROGRAMME

- 09.30-10.00** **Presentation of Development Plans of DHI Water & Environment**
- Exciting news about the 2003 release, including new WQ lab facility for MIKE 11
 - Interesting new developments in the pipeline such as further integration between MIKE 11 and MIKE SHE/MIKE BASIN
 - The role of GIS in the software packages
 - Progress towards Open-ended software architecture
- 10.00-11.00** **Presentation and discussion of MIKE SHE – Integrated Groundwater and Surface Water Modelling**
- ✓ What is MIKE SHE?
 - ✓ MIKE SHE on the MIKE Zero Platform
 - ✓ Release schedule for MIKE SHE 2003
 - ✓ Hints and opportunities
 - ✓ Case studies and applications
- 11.00-11.15** **Coffee Break**
- 11.15-12.00** **Presentation and discussion of MIKE BASIN – Water Resources/Planning**
- ✓ What is MIKE BASIN?
 - ✓ Description of MIKE BASIN components
 - ✓ Hints and opportunities
 - ✓ Conversion of MIKE BASIN to ArcGIS 8
 - ✓ Release schedule for MIKE BASIN 2003
 - ✓ Case Studies and applications
- 12.00-13.00** **Discussion**
- 14.00-17.00** **Individual meetings (30 minutes' duration) with Mr Borge Storm**
